Integration indicators. On the sustainability of integration policy in Vienna
(*Integrationsindikatoren. Zur Nachhaltigkeit der Wiener Integrationspolitik*)

Editor: The institute of conflict research (*Institut für Konfliktforschung*)

Place of publication: Vienna

Year: 2000

Resource type: report

Format: HTML (abstract)

ISBN: —

Abstract: The authors put forward 67 integration indicators. Most of them have socio-economic dimensions, e.g., family structure, resident permits, naturalisation, population flows, educational attainment, employment, income, poverty, poverty risk, wealth, housing, health; others are so called participation indicators (social contacts, political participation), cultural indicators (awareness raising, language, media, arts, culture, religion), and legal indicators.

Migration, integration, diversity politics

(Migration, Integration, Diversitätspolitik)

Publisher: MA 18 (Stadtentwicklung & Stadtplanung)

Place of publication: Vienna

Year: 2002

Resource type: report

Format: PDF

ISBN: —

Abstract: Integration policy in Vienna aims at reducing situations of conflict; in addition it develops local initiatives in order to promote integration of foreigners into society. The challenge is to establish new policies built on equal opportunities. In the coming years, integration policy in Vienna will increasingly be characterised by diversity policies to promote the transformation process.

Migration and settlement in Vienna II on the basis of a survey on "living in Vienna"

(Einwanderung und Niederlassung in Wien II. Sonderauswertung der Befragung "Leben in Wien")

Publisher: Institute for Advanced Studies (IHS), Institute for Social Research and Analysis (SORA)

Place of publication: Vienna

Year: 1998

Resource type: report

Format: —

ISSN: 1605-7996

Abstract: Building on former research into migration and settlement, the authors describe in more detail return intentions of foreigners by analysing social integration, discrimination processes, language aspects, poverty risk and integration into the labour market.

Keywords: foreign population, labour market integration, discrimination

Language: GER

Economic Consequences of Migration for National Economies

Editors: City of Vienna, OECD

Contained in: Proceedings of the International Conference on Migration and Sustainable Urban Development

Volume, number, pagination: pp.29-33

Publisher: City of Vienna, OECD

Place of publication: Vienna

Year: 1998

Resource type: conference paper (Werkstattbericht)

Format: —

ISBN: 3-902015-16-0

Abstract: Immigration has become a feature of economies throughout the industrialised world. Part of immigration is labour migration, which, in general, has contributed to the increase in worker mobility since the mid 1980s. In addition to the economic impact of immigration on national economics the author also explains economic reasons (demand-pull-factors), social and population policy reasons as well as business, military, diplomatic and humanitarian reasons.

The impact of demographic changes on labour supply in the EU

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: Austrian Economic Quarterly

Volume, number, pagination: Volume 3(4), pp. 219-228

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 1998

Resource type: article

Format: PDF

ISSN: 1605-4709

Abstract: Ageing of the population of working age set in the course of the 1990s and will continue well into the next century. The age structure of labour supply differs more between regions of the EU than the structure of the population of working age. Different educational, welfare and tax systems and policies as well as economic developments and cultural factors account for major differences in labour force participation rates by age and gender. Currently the share of older workers in the labour force has a spread from 14 to 26 percent in the EU – a result of the interaction of demographic and socioeconomic as well as institutional factors.

ISBN: 3-214-17552-1

Abstract: One objective of migration analysts is to identify characteristics of migrants and migration flows, which reflect the objective of migration policy as well as autonomous migration developments, which somehow are beyond the reach of migration policy and control. Statistics are to inform about dynamics and structural developments of the different forms of migration, the economically driven ones as well as the politically driven ones, and their respective impact on the labour market and the society at large.

Migrations and their role in the integration of Western Europe

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: WIFO Monthly Report

Volume: 72(6), pp. 499-513

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 1999

Resource type: article

Format: PDF

ISSN: 0029-9898

Abstract: This paper presents a review of theories on the role of migration in socio-economic processes in the light of actual migratory processes within the different regions in Europe and the role of migration policy in structuring and accommodating migration. Labour migration within the EU is marked by the changing role of the individual member countries in the development of economic growth. The catching-up process of Southern European countries was accompanied by the convergence of income levels and the drying up of labour surplus, which led to a decline of out-migration from Southern Europe to Northern Europe.

Insider and Outsider, nationals and foreigners: Where are the border lines?

(Insider und Outsider, Inländer und Ausländer: wo sind die Grenzen?)

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: WIFO Working Papers

Volume: 125

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 1999

Resource type: article

Format: PDF

ISBN: —

Abstract: Job fluctuation arose in the mid 1980s and 1990s which catapulted Austria into the top rank of EU-countries in terms of job flexibility; the large job and wage flexibility comes somewhat as a surprise given the high union density and the important role of labour market regulation in Austria. The rise in job fluctuation resulted from a compositional change in labour supply and labour demand as well as institutional change. Long-term unemployment is, according to the insider-outsider-hypothesis, a result of a conflict of interests between groups of workers and not between the employer and employee. Antagonists are on the one hand workers who have a stable and well paying job (insiders) and on the other hand workers, who have unstable jobs which carry low wages; they are frequently or long-term unemployed (outsiders). The study shows that prime age men have not only the greatest job stability but also the highest wages — and the same is true for national workers in contrast to foreign workers. Continued employment and rising wages are, at any age, less certain for women than for men. The gender gap between the probability of being employed for another year has declined in the early 1990s.

(Internationale Migration, Die globale Herausforderung des 21. Jahrhunderts?)

Volume, number, pagination: Series of the History of Social Development Volume 17, Intenational Developments, pp. 207-227

Publisher: Brandes & Apsel/Südwind

Place of publication: Vienna

Year: 2000

Resource type: article

Format: —

ISBN: 3-860991957

Abstract: This article deals primarily with the topic of foreign workers and their position on the Austrian labour market. Because of legal ramifications and economic factors foreign workers are normally not integrated into internal labour markets. This has implications for continuing employment patterns as well as the fact that foreign workers are often less educated.

ISSN: 1323-6903

Abstract: The integration of Europe has entered a new dimension in the 1990s by introducing an open co-ordination process of politics in the field of migration, employment and education in the EU. The objective of policy co-ordination is to increase the understanding of institutional and functional mechanisms of governance in the member countries and to promote free mobility of labour within the EU.

Migration policies in Western Europe and the EU-enlargement

Editor: OECD (Organisation for Economic Co-operation and Development)

Contained in: Migration Policies and EU Enlargement: The Case of Central and Eastern Europe

Volume, number, pagination: pp. 155-168

Publisher: OECD (Organisation for Economic Co-operation and Development)

Place of publication: Paris

Year: 2001

Resource type: article

Format: —

ISBN: 92-64-18584-4

Abstract: Migration policies are based on a vision of the role of migration in socio-economic, political and cultural development. For that reason, they are among the most complex and controversial policy issues in any country, their formulation being determined by intertwined socio-economic, cultural, political, and strategic and security aspects. In addition, international differences result from varying traditions in social organisations which are deeply rooted in history. It is therefore not surprising that a variety of migration policies and systems developed in Western Europe in the course of time.

Labour market and employment policy: European Co-ordination policy as an answer to global economic change

(Arbeitsmarkt und Beschäftigungspolitik: Europäische Koordination als Antwort auf globalen wirtschaftlichen Umbruch)

Editor(s): Heinrich Neisser, Sonja Puntscher-Riekman (Ed.)

Contained in: Influence of European policies to Austria: consequences of EU-membership *(Europäisierung der österreichischen Politik: Konsequenzen der EU-Mitgliedschaft)*

Volume: 26, pp. 295-318

Publisher: WUV Universitätsverlag

Place of publication: Vienna

Year: 2002

Resource type: book

Format: —

ISBN: 3-85114-680-8

Abstract: The article in question is about technological change, competitiveness and efficiency measures which are necessary to improve efficiency and labour productivity which also affects workers. It will lead to more and longer spells of unemployment as well as to an increasing demand for adult learning. And this also concerns family structures because of growing uncertainties in employment and income levels.

Year: 2002

Resource type: article

Format: PDF

ISSN: 0029-9898

Abstract: In the last 20 years immigration to Austria has not only gained momentum but has also undergone significant structural change. On the one hand refugees, asylum seekers and family members of foreign residents entered in increasing numbers, on the other rising migration flows resulted from Austria's membership to the EU and the opening up of Central and Eastern European Countries (CEECs). Austria has not succeeded to attract large numbers of highly skilled migrants for settlement in Austria, in spite of an explicit immigration policy reorientation in the 1990s. Highly skilled workers tend to come from the European Economic Area and, to a lesser extent, from CEECs. They tend to be temporary residents in Austria, contrary to migrants from the traditional source regions in South-East Europe and Turkey and of refugees, who tend to settle in Austria.

The role of migrants in the production of tradeables and non-tradeables. The case of Austria

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: WIFO Working Papers

Volume: 194

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 2003

Resource type: Article

Format: PDF

ISBN: —

Abstract: In the course of the 1990s, labour mobility in Western Europe lagged behind the growth in international trade of goods and services as industries employing a high proportion of migrants in the production of trade-able goods declined. Technological developments, the reduction in transport costs as well as catching up processes in the productive capacities of less developed trading partners, e.g., Central and Eastern European Countries (CEECs), resulted in a change in the composition of production of trade-able goods. However, the composition of migrant labour by industry and skills changed little, and labour mobility lost momentum. Thus, the transfer of production of goods and services to less developed countries, in the case of the EU, CEECs, contributed to the loss of momentum in demand pull migration. Recent developments especially in communications technology, tended to promote mobility of services rather than labour mobility. As long as capital, technology and managerial skills are mobile, labour may remain in the country of origin, e.g., the case of Indian computer programmers.

Resource type: conference paper

Format: PDF

ISBN: —

Abstract: Migrant workers in Western Europe are concentrated in industries with a low capital-to-labour ratio and low-to-medium-tech production processes. As CEECs opened up to international trade, relative production costs changed suddenly and significantly, particularly in the stages of production with a high migrant-worker component. In the circumstances, the economic rationale for the employment of migrants was nullified and replaced by trade. Indeed, trade did not only allow investors to tap into resources less efficiently used than in the West but also to access the markets of CEECs. A specialisation in industrial production ensued on both sides of the EU borders during the 1990s, resulting in increased inter- and intra-industry trade, as well as growth in economic activity, employment and productivity.

ISBN: —

Abstract: There are marked differences in health conditions of the Austrian population by socioeconomic status, gender, age, education, occupation and income as well as by nationality. The low educational attainment of migrants, their concentration in particular occupations and industries and their above-average unemployment rate, are associated with an above-average morbidity rate of middle aged and older migrants. In addition, migrants exhibit another pattern of diseases than natives. They suffer to a greater extent than Austrians, from heart diseases, allergies, digestive and urogenital and dermatological problems. This may be partly the result of the particular stress situations they face in the work place and the community at large.

Abstract: Austria is amongst the leading western industrialised immigration countries. The first 15 years after WWII were marked by massive flows of people into Austria (refugees) and out of Austria (emigration of nationals and refugees). At the onset of full employment in the early 60ies, Austria adopted a guest worker programme tailored after the Swiss and German model - to compensate for the continued loss of labour, in the main highly skilled, at that stage to western European countries, particularly Germany, Switzerland and France, a result of social security agreements and the fact that Austria was at the lower end of wages in Europe (similar levels as in Italy and Spain, which explains why Austria did not manage to attract guest workers from these regions in spite of treaties with these countries). Major source countries before the 1960s were the former regions of the Austro-Hungarian monarchy, from the 60ies till today the region of former Yugoslavia and Turkey, since the late 1980s increasingly from CEECs and since the mid 1990s more and more from EU member states.

Abstract: The EU strives to increase the mobility of students of higher education not only as an objective in its own right but also to promote labour mobility. The latter is seen as a necessary means to increase the efficiency of allocation of resources in an integrated Europe. It is expected to generate economic growth and welfare gains, as well as to foster the understanding of the diversity of cultures and thus promote social cohesion in Europe.

Gudrun Biffl

Migrant Youth in Austria

(Chancen von jugendlichen Gastarbeiterkindern in Österreich)

Editors: WISO (Economic and social policy journal)

Volume, Number, Pagination: 27(2), pp. 37-55

Publisher: Institute for Social Sciences and Economics, Chamber of Labour

Place of publication: Linz

Year: 2004

Resource type: article

Format: —

ISSN: 1017-3059

Abstract: The author analyses educational attainment and employment opportunities of Turkish and ex-Yugoslav youngsters between 1981 and 2002. In spite of better educational attainment levels in the 1990s, unemployment under young foreigners continues to be very high. In the case of young female Turks, an increased withdrawal from the labour market is of particular concern for policy makers.

Keywords: migrants, qualification, employment possibilities

Foreigners in Austria. Migration policy and integration

(AusländerInnen in Österreich. Migrationspolitik und Integration)

Publisher: Labour Market Service Austria

Place of publication: Vienna

Year: 1998

Resource type: report

Format: —

ISBN: 3-85170-015-5

Abstract: This report covers a wide field of migration policy and impact. It contains information on migration policy developments (written by Gudrun Biffl), legal ramifications (by August Gächter), structural and demographic aspects of integration (foreign population by nationality, age structure, educational attainment, and gender) (by Karoly Cserjan et al.), labour market integration of foreigners (labour force participation rates, foreign employment, income structure) (by Gudrun Biffl), unemployment of foreigners (by Karoly Cserjan et al.), and unemployment duration and incidence (by August Gächter, Helga Matuschek et al.). Moreover Gudrun Biffl describes economic aspects of foreign integration by analysing costs and benefits of migrants' in the context of social policy, and Markus Marterbauer examines macroeconomic developments.

Keywords: foreign population, foreign employment, unemployment (stock-flow), cost and utility of foreign integration, macroeconomic effects

Educational levels of migrants from Slovenia, Czech Republic and Hungary and their position on the Austrian labour market

(Qualifikationsniveau von slowenischen, tschechischen und ungarischen ArbeitsmigrantInnen und ihre Position am österreichischen Arbeitsmarkt)

Publisher: ICMPD (International Centre for Migration Policy Development)/ÖFM
(Austrian forum of migration studies)

Place of publication: Vienna

Year: 1999

Resource type: article

Format: PDF

ISBN: —

Abstract: The aim of this study is to explain foreign employment not only by age, gender, occupational status and branches but also by educational attainment levels in order to provide a deeper insight into their impact on the Austrian labour market. Their focus lies on migrants from CEEC, namely from Slovenia, the Czech Republic and Hungary, their different educational attainment levels compared to Turkish and former Yugoslav migrants. Although Austrian agencies do not easily acknowledge foreign degrees, educational levels of workers from CEEC are on average higher than of "classical" migrants and even of nationals.

Care of older migrants in Vienna

(Betreuungssituation von älteren Migrantinnen und Migranten in Wien)

Editor: Christoph Reinprecht

Contained in: Older migrants in Vienna. Empirical evidence on life cycle, social integration, and ageing (*Ältere MigrantInnen in Wien. Empirische Studien zu Lebensplanung, sozialer Integration und Altersplanung*)

Volume, number, pagination: pp. 105-126

Publisher: Christoph Reinprecht

Place of publication: Vienna

Year: 1999

Resource type: article

Format: —

ISBN: —

Abstract: This article was written on the basis of results from "senior plus", an URBAN-project funded by the integration fund of Vienna, co-financed by the EU. It analyses living conditions of migrants in Vienna, in particular of older migrants, and their access to age-related agencies. Social inequalities and language problems as well as fears of dealing with authorities make the satisfaction of their needs more difficult. Lots of agencies are not well prepared for helping older migrants.

EQUAL Office Austria, Federal Ministry of Economic Affairs and Labour

The Austrian Development Partnerships

(Die österreichischen Entwicklungspartnerschaften)

Publisher: EQUAL office Austria

Place of publication: Vienna

Year: 2001

Resource type: brochure

Format: PDF

ISBN: —

Abstract: The Community Initiative EQUAL was established in Europe to test new ways of tackling discrimination and inequality experienced by those in work and those looking for a job. EQUAL represents a major challenge in a number of aspects. Solutions based on partnership, innovation and cross border co-operation are the four points of all EQUAL activities. EQUAL differs from conventional labour market policy programmes. It does not provide support for individual measures but rather aims at encouraging co-operation among all relevant actors as well as bundling know-how in particular regions or on special topics. Austrian development partnerships are committed to meeting these objectives and include a correspondingly broad spectrum of participants: the Austrian social partners, at least three non-governmental organisations, institutions on the regional level, experts from the public sector, but also enterprises and educational institutions. Together these participants have formulated labour market policy objectives and proposals for solving problems, and now they are working together on their realisation. The distribution of development partnerships by six themes is as follows: Re-integration to the labour market and combating on-going marginalisation, facilitating the integration of people with disabilities, combating racism and xenophobia on the labour market, improving the quality of workplaces in the social economy, promoting lifelong learning and inclusive work practices, reduction of gender-specific segregation on the labour market and activities for asylum-seekers.

EU-enlargement and labour migration to Germany and Austria. Quantitative forecasts and current development tendencies

(EU-Erweiterung und Arbeitsmigration nach Deutschland und Österreich. Quantitative Vorhersagen und aktuelle Entwicklungstendenzen.)

Editor: IMIS-Beiträge (Institute for migration research and inter-cultural studies)

Volume, number, pagination: 19/2002, pp. 65-88

Publisher: IMIS (Institute for migration research and inter-cultural studies)

Place of publication: University of Osnabrück

Year: 2002

Resource type: article

Format: PDF

ISSN: 0949-4723

Abstract: This article describes consequences of EU-enlargement, firstly on the Austrian labour market at large, secondly on the border regions to Czech Republic, Slovak Republic, Hungary and Slovenia, and thirdly on agriculture. Some are afraid of cheap foreign workers because of growing wage gaps and unemployment. And others are of the opinion that one ought to welcome foreign workers because of an ageing Austrian society. The latter group of persons thinks that only a few migrants will enter the Austrian labour market.

Labour market Central Europe. The return of historical migration patterns

(Arbeitsmarkt Mitteleuropa. Die Rückkehr historischer Migrationsmuster)

Editor: Austrian Academy of Sciences

Contained in: ISR – research reports (*ISR-Forschungsberichte*)

Volume, number, pagination: 18

Publisher: Austrian Academy of Sciences

Place of publication: Vienna

Year: 1999

Resource type: report

Format: —

ISBN: 3-7001-2783-9

Abstract: The research report documents the re-emergence of a Central European labour market, whereby commuting plays an important role in 'reshaping' the formerly distorted regional labour markets in Slovakia, Hungary, the Czech Republic and Poland. This process can be documented on the basis of real and potential labour migration, commuting and strategies of job search in a larger labour market sphere. The empirical analysis is based on extensive own research (surveys and analysis of job advertisement) as well as official data.

Foreign workers in Germany and Austria

(Ausländische Arbeitskräfte in Deutschland und Österreich)

Editors: Heinz Fassmann, Helga Matuschek, Elisabeth Menasse-Wiesbauer

Contained in: Disassociation — exclusion — admission. Empirical evidence on xenophobia and integration (*Abgrenzen - Ausgrenzen - Aufnehmen. Empirische Befunde zu Fremdenfeindlichkeit und Integration.*)

Volume, number, pagination: 1, pp. 95-114

Publisher: DRAVA-Verlag

Place of publication: Klagenfurt

Year: 1999

Resource type: book

Format: —

ISBN: 3-85435-316-2

Abstract: The authors compare the situation of foreign workers in Germany and Austria. In spite of similar migration histories, migrants and their families have different career opportunities in Germany and Austria. The Austrian labour market is characterised by ethnic segmentation while — according to the opinion of the authors — this is not the case in Germany. In the case of Germany migrants often work in large companies with internal carrier possibilities while in the case of Austria migrants are concentrated in small and medium-sized companies. There they are hardly able to become part of core-staff.

Keywords: foreign workers, insider, outsider, labour market, career possibilities

Open! Migrants as entrepreneurs. A possibility for local economic growth

(Geöffnet! Migrantinnen und Migranten als Unternehmer. Eine Chance für die lokale Wirtschaftsentwicklung)

Publisher: Verlag Guthmann Peterson

Place of publication: Vienna, Mühlheim/Rhein

Year: 1999

Resource type: book

Format: —

ISBN: 3-900782-18-0

Abstract: Migrants are well researched in the field of labour, housing, educational attainment but not in the area of entrepreneurs in Austria. Experience from Vienna, Berlin, Glasgow, and Lisbon show that self-employment of migrants is more than an informal job opportunity. The goal of the meeting "Migrants as entrepreneurs — a chance for local economic structure" was to bring responsible persons from businesses, politics and research together to inform about the growing importance of migrants as entrepreneurs for local economic performance.

Keywords: entrepreneurship, migration

Living conditions of foreigners in Austria

(Lebensbedingungen von AusländerInnen in Österreich)

Editors: Statistics Austria

Contained in: Statistical news (*Statistische Nachrichten*)

Volume, number, pagination: 54(11), pp. 965-980

Publisher: Statistics Austria

Place of publication: Vienna

Year: 1999

Resource type: article

Format: —

ISSN: 0029-9960

Abstract: In the period of examination, 1989 to 1998, the years until 1993 were strongly affected by immigration, particularly due to the crisis in former Yugoslavia. In this period the foreign population rose by more than 300.000 (from 387 000 to 690 000 persons). From 1994 immigration policies were more restrictive, accordingly the proportion of the foreign population stagnated at about 9% of the total population (1998: 737 000). Foreigners living in Austria face worse living conditions than residents. Already in the institutional care of children they experience first disadvantages, receive less education, work in more badly paid labour market segments, suffer from higher unemployment ratios, are affected by more unfavourable conditions of work and live in less comfortable flats than their Austrian counterparts.

Resource type: article

Format: PDF

ISSN: 1605-7996

Abstract: Helmut Hofer and Peter Huber try to explain the effect of trade and migration on wages and labour market flexibility in the case of Austria. On the basis of previous results on the impact of trade and migration they present data which they used for preparing a theoretical labour market model. Their results indicate that rising imports and rising inflows of migrants decrease labour mobility of all types of workers. The risk of becoming unemployed is — in contrast — increased by migration and imports only in the case of blue-collar workers, but decreasing by exports for all types of workers.

Year: 1999

Resource type: report

Format: PDF

ISBN: —

Abstract: The institution "family" in connection with migration becomes more and more important during the last two decades. While in the 1970s labour migration was characterised by limited settlement in Austria, today labour migration often means unlimited stay in Austria. Therefore integration into society and labour market becomes more pervasive.

The economic effects of immigration: a review of literature.

(Die volkswirtschaftlichen Auswirkungen der Zuwanderung von Arbeitskräften. Ein Literaturüberblick)

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: WIFO Monthly Report

Volume: 73(2), pp. 95-112

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 2000

Resource type: article

Format: PDF

ISSN: 0029-9898

Abstract: The opening of the East and the proposed integration of the countries of Central and Eastern Europe into the EU has focused attention on the economic and social affects of immigration to Europe. This literature review draws on US and German studies to outline the impact of immigration on various groups in the economy. In a flexible labour market, the overall macroeconomic effects typically turn out to be minimal. A 10 percent increase in the supply of labour due to immigration brings about a net gain to the native population of around 0.1 percent of national income. This figure makes large redistribution effects, however. The main beneficiary of immigration is native-owned capital, which experiences a net gain of 2 percent of income, while workers suffer losses, with unskilled workers being particularly hard hit.

Upper Austria: social report: migration
(*Oberösterreichischer Sozialbericht*)

Editors: Upper Austria (*Land Oberösterreich*)

Contained in: Social report

Volume, number, pagination: pp. 233-262

Publisher: Upper Austria

Place of publication: Linz

Year: 2003

Resource type: report

Format: PDF

ISBN: —

Abstract: The migration to Upper Austria is characterised by two factors, on the one hand labour migration (6.57 % of the employed persons were foreigners requiring a work permit in 2001) and on the other hand refugee migration (asylum seekers, recognised refugees). The acquisition of the Austrian nationality is considered to be the last step of a successful integration for a certain segment of the migrants. 5,449 persons were naturalised in Upper Austria in the year 2001.

Pathways for integration. Possible ways against discrimination and xenophobia

(Wege zur Integration. Was man gegen Diskriminierung und Fremdenfeindlichkeit tun kann)

Publisher: Verlag DRAVA

Place of publication: Klagenfurt

Year: 2001

Resource type: book

Format: —

ISBN: 3-85435-363-4

Abstract: Austria is a country with an open immigration policy — but legal and social discrimination continues to exist. The author promotes a new self-image of the Austrian society as a country with an open immigration policy, equal opportunities, anti-discrimination, and integration assistance. This book appeals to persons who are interested in the situation of migrants as well as interested in a better understanding of social cohesion.

The effects of EU-enlargement on the Austrian labour market

(Auswirkungen der EU-Osterweiterung auf den österreichischen Arbeitsmarkt)

Editor: Austrian Institute of Economic Research (WIFO)

Contained in: WIFO Monthly Report

Volume: 71(8), pp. 531-540

Publisher: Austrian Institute of Economic Research (WIFO)

Place of publication: Vienna

Year: 1998

Resource type: article

Format: PDF

ISSN: 0029-9898

Abstract: In the wake of the EU enlargement the high disparity in wages is likely to result in a considerable influx of foreign workers. If freedom of movement were to be implemented in the year 2005, Austria would have to reckon with about 42,000 migrants and cross-border workers in the first year. In the medium term (5 to 7 years), Austria could expect an inflow of 150,000 to 200,000 persons, with cross-border workers making up the majority. If, by way of transition periods (similar to those used in the EU Southern enlargement), the freedom of movement can be postponed until the year 2015, the number of migrants and cross-border workers will be reduced by one fourth, owing to the economic catching-up process of the Eastern countries. This inflow would be more easily absorbed, indeed welcomed, by the Austrian labour market, because, for demographic reasons, the supply of labour in Austria will fall by 420,000 persons during the period 2015 to 2030.

Do immigrants displace native workers?

Editor: Journal of Population Economics, Institute for the study of labour (IZA)

Volume, number, pagination: 12(2), pp. 327-340

Publisher: Journal of Population Economics

Place of publication: Bonn

Year: 1999

Resource type: article

Format: —

ISSN: 0933-1433 (Paper), 1432-1475 (Online)

Abstract: This paper studies the effect of immigration on natives, in particular their risk of becoming unemployed. The period under analysis is the end of the 1980s and the early 1990s when Austria experienced a dramatic rise in the share of foreign workers as a result of the breakdown of the former communist regimes. The authors focus on young male workers and the impact of immigrants on their labour market performance. The results indicate that the detrimental impact on native young men is only minor and is irrespective of the chosen proxy for competition (the share of foreign workers in an industry, in a region or at the firm level).

On the fiscal impacts of immigration

Publisher: University of Linz

Place of publication: Linz

Year: 2004

Resource type: doctoral thesis

Format: —

ISBN: —

Abstract: Karin Mayr analyses public finance effects of immigration empirically and theoretically. Firstly, she describes fiscal impacts of immigrants in Austria by using a generational accounting model which allows her to take demographic scenarios into account. Secondly, the author uses a political economy model in order to look at the impact of immigrant voting on the outcome of a (direct) tax vote. Therefore, she is able to give information about the actual role of immigrants in fiscal redistribution in the host country and about the political influence on the level of such redistribution.
